

Foresight's Commitment to Tribal Energy Development

- ▲ To work in partnership with Native American Tribes to maximize their economic benefit and ensure a successful working alliance.
- ▲ To tailor wind energy technical, financing, power marketing and project development expertise to match each Tribes' needs for renewable energy resource development and their desire to retain equity in projects developed on their lands.
- ▲ To use a holistic approach to Tribal wind energy development that maintains a balance with the use of the land, water, and natural resources while enhancing the human, cultural and economic resources.

NATIVE WIND: SUSTAINABLE ECONOMIC DEVELOPMENT

Project Partnerships

Foresight Wind Energy is committed to working with Native American Tribes to help them fulfill their goals for:

- ▲ Clean energy development
- ▲ Sustainable Tribal economies
- ▲ Employment and human capacity building
- ▲ Land use management compatible with cultural and environmental values.

Foresight works closely with members of Tribal Agencies and Councils to tailor each project partnership to meet the specific needs and interests of that Tribe.

Project plans can include full participation by Tribal members. Projects can also be structured for equity participation by Tribes.

Foresight works in partnership with Native American Tribes, offering project participation and equity positions.

Foresight Wind Energy is at the forefront of wind development in the Southwest, with

over 2,000 megawatts of projects in process. We have the skills and experience to help Native American Tribes advance wind projects from concept to reality.

Our team of seasoned energy professionals bring wind energy technical, financial, permitting, power marketing, and project development expertise. We can provide access to risk capital and assist Tribes in winning grants and other federal funds.

Our wind energy development expertise includes:

- ▲ Wind resource assessment
- ▲ Project permitting
- ▲ SW power market & transmission
- ▲ Access to turbines & development capital
- ▲ Business, project & tax structuring
- ▲ Grants and funding sources (DOE, USDA, EPA, BIA, HUD, EDA, Title V)
- ▲ RECs and Green Tag Marketing
- ▲ Title V Tribal Energy Resource Agreements (TERAs)

Tribal Energy Benefits

Economic Development

- ▲ New revenues (lease royalties, tax revenues, ownership returns)
- ▲ Equity participation
- ▲ Local economic stimulus during construction and operations

Capacity Building

- ▲ New business models
- ▲ Hi-tech jobs and training

Environmental

- ▲ No air pollution or toxic emissions
- ▲ Virtually no water use
- ▲ Low land impact
- ▲ Compatible with grazing, agriculture and other land uses
